Current Rates of Smoking and Tobacco Use in Dominica

Tobacco use continues to be an epidemic in Dominica. Government complacency in the face of the tobacco epidemic protects the tobacco industry in Dominica as the death toll grows each year. Proponents of healthier societies must push for the implementation of evidence-based best practices in tobacco control to create change and reduce the negative effects of tobacco use.

Negative Effect of Tobacco Use in Dominica

Tobacco use harms both the public and fiscal health of Dominica, threatening efforts to improve equity, alleviate poverty, and protect the environment.

Societal Harms
The global economic cost of smoking is estimated at around $US 1.85 trillion, or around 1.8% of global GDP. This includes direct costs related to healthcare expenditures and indirect costs related to lost productivity caused by illness and premature death.

Harms Development
Tobacco spending diverts funds from the resources that families need to rise out of poverty. On average in Dominica, a smoker must spend 2.40% of GDP per capita to buy 100 packs of the most popular cigarettes in a year.

Environmental Harms
Cigarette butts are the most commonly discarded pieces of waste worldwide. It is estimated that 1,102,311 tons of butts wind up as toxic trash in the world each year, equal to 416,667 female African elephants.

Harms Health Equity
The tobacco industry markets its products aggressively to lower-income populations and youth in Dominica.

Harms NCDs
Not only is smoking a major risk factor for the 4 largest noncommunicable diseases (cancer, heart diseases, respiratory diseases, and diabetes), but people living with mental illness are nearly 2x as likely to smoke as other individuals.

Impact of the Tobacco Supply Chain on Dominica

The tobacco industry profits significantly from producing and selling tobacco. At the same time, across the tobacco supply chain, there are significant negative health and economic repercussions for Dominica.

Tobacco Production
There were more than 5,000,000,000,000 cigarettes produced in the world in 2019, or nearly 2 cigarettes per person per day.

Tobacco Industry
The total revenue of the 6 largest tobacco companies in the world was USD 336 billion in 2019, about the same as Viet Nam’s Gross National Income (GNI), 5x Ghana’s GNI and 9x Paraguay’s GNI.

Tobacco Growing
Dominica is not a major producer of tobacco, but globally there were 3.1 million hectares of arable land dedicated to tobacco growing in 2021 which was nearly as much as the land dedicated to the world’s large orange crop.

Ending the Tobacco Epidemic in Dominica

Fortunately, there are evidence-based -i.e. proven -solutions to the challenges posed by tobacco use. For several decades, governments around the world have been introducing a set of policies that address the demand for tobacco products, particularly among youth. These policies effectively reduce consumption and are cost-effective because they save goverments enormous amounts of money in health care spending and increase economic productivity.

Tobacco Tax Policies in Dominica

Using evidence-based international recommendations/best practices, the Tobacconomics Cigarette Tax Scorecard assesses four components of tax systems - price, change in affordability, tax share, and structure - on a scale of 0 to 5, where a higher score is preferred.

### Overall Score

1.25
The overall score is an average of the four component scores.

#### Cigarette Price

1
Consumers respond to higher prices by decreasing consumption and some quit using tobacco.

#### Change in Affordability Over Time

0
In addition to price, change in affordability is critical. Cigarettes need to become less affordable for consumption to decline.

#### Tax Share of Price

0
Large tax shares of price are usually a good indicator that taxes are working.

#### Tax Structure

4
Best practices include relying more on uniform specific excise taxes that are adjusted regularly to outpace growth and inflation.
