Paraguay

How many people die from smoking in Paraguay each year?
4,940

What is the economic cost of smoking and tobacco use in Paraguay each year?
2,162,201,985,024 guaranis

Current Rates of Smoking and Tobacco Use in Paraguay

Tobacco use continues to be an epidemic in Paraguay. Government complacency in the face of the tobacco epidemic protects the tobacco industry in Paraguay as the death toll grows each year. Proponents of healthier societies must push for the implementation of evidence-based best practices in tobacco control to create change and reduce the negative effects of tobacco use.

Negative Effect of Tobacco Use in Paraguay

Tobacco use harms both the public and fiscal health of Paraguay, threatening efforts to improve equity, alleviate poverty, and protect the environment.

Societal Harms
The economic cost of smoking Paraguay is 2,162,201,985,024 guaranis. This includes direct costs related to healthcare expenditures and indirect costs related to lost productivity caused by illness and premature death.

Environmental Harms
Cigarette butts are the most commonly discarded pieces of waste worldwide. It is estimated that 369 tons of butts wind up as toxic trash in Paraguay each year, equal to 105 female African elephants.

Harms Health Equity
The tobacco industry markets its products aggressively to lower-income populations and youth in Paraguay.

Harms NCDs
Not only is smoking a major risk factor for the 4 largest noncommunicable diseases (cancer, heart diseases, respiratory diseases, and diabetes), but people living with mental illness are nearly 2x as likely to smoke as other individuals.

Learn more about Health Effects.
Impact of the Tobacco Supply Chain on Paraguay

The tobacco industry profits significantly from producing and selling tobacco. At the same time, across the tobacco supply chain, there are significant negative health and economic repercussions for Paraguay.

Tobacco Production
There were more than 5,000,000,000,000 cigarettes produced in the world in 2019, or nearly 2 cigarettes per person per day.

Tobacco Industry
The total revenue of the 6 largest tobacco companies in the world was USD 336 billion in 2019, about the same as Viet Nam’s Gross National Income (GNI), 5x Ghana’s GNI and 9x Paraguay’s GNI.

Tobacco Growing
There were 7175 tons of tobacco produced in Paraguay in 2019 on 3500 hectares of quality agricultural land that could have been used to grow food.

Ending the Tobacco Epidemic in Paraguay

Fortunately, there are evidence-based -i.e. proven -solutions to the challenges posed by tobacco use. For several decades, governments around the world have been introducing a set of policies that address the demand for tobacco products, particularly among youth. These policies effectively reduce consumption and are cost-effective because they save governments enormous amounts of money in health care spending and increase economic productivity.
