Current Rates of Smoking and Tobacco Use in Philippines

Tobacco use continues to be an epidemic in Philippines. Government complacency in the face of the tobacco epidemic protects the tobacco industry in Philippines as the death toll grows each year. Proponents of healthier societies must push for the implementation of evidence-based best practices in tobacco control to create change and reduce the negative effects of tobacco use.

Negative Effect of Tobacco Use in Philippines

Tobacco use harms both the public and fiscal health of Philippines, threatening efforts to improve equity, alleviate poverty, and protect the environment.

Societal Harms

The economic cost of smoking Philippines is 246,027,272,192 Philippine pesos. This includes direct costs related to healthcare expenditures and indirect costs related to lost productivity caused by illness and premature death.

Harms Development

Tobacco spending diverts funds from the resources that families need to rise out of poverty. On average in Philippines, a smoker must spend 5.95% of GDP per capita to buy 100 packs of the most popular cigarettes in a year.

Environmental Harms

Cigarette butts are the most commonly discarded pieces of waste worldwide. It is estimated that 11,201 tons of butts wind up as toxic trash in Philippines each year, equal to 3,200 female African elephants.

Harms Health Equity

The tobacco industry markets its products aggressively to lower-income populations and youth in Philippines.

Harms NCDs

Not only is smoking a major risk factor for the 4 largest noncommunicable diseases (cancer, heart diseases, respiratory diseases, and diabetes), but people living with mental illness are nearly 2x as likely to smoke as other individuals.

Impact of the Tobacco Supply Chain on Philippines

The tobacco industry profits significantly from producing and selling tobacco. At the same time, across the tobacco supply chain, there are significant negative health and economic repercussions for Philippines.

Tobacco Production

There were approximately 85 billion cigarettes produced in Philippines in 2016.

Tobacco Growing

There were 51061 tons of tobacco produced in Philippines in 2019 on 28008 hectares of quality agricultural land that could have been used to grow food.

Tobacco Industry

The total revenue of the 6 largest tobacco companies in the world was USD 336 billion in 2019, about the same as Viet Nam's Gross National Income (GNI), 5x Ghana's GNI and 9x Paraguay's GNI.

Ending the Tobacco Epidemic in Philippines

Fortunately, there are evidence-based -i.e. proven -solutions to the challenges posed by tobacco use. For several decades, governments around the world have been introducing a set of policies that address the demand for tobacco products, particularly among youth. These policies effectively reduce consumption and are cost-effective because they save governments enormous amounts of money in health care spending and increase economic productivity.

Tobacco Tax Policies in Philippines

Using evidence-based international recommendations/best practices, the Tobacco Economics Cigarette Tax Scorecard assesses four components of tax systems - price, change in affordability, tax share, and structure - on a scale of 0 to 5, where a higher score is preferred.

Overall Score	Cigarette Price	Change in Affordability Over Time	Tax Share of Price	Tax Structure
<p>3.63</p> <p>The overall score is an average of the four component scores.</p>	<p>2</p> <p>Consumers respond to higher prices by decreasing consumption and some quit using tobacco.</p>	<p>5</p> <p>In addition to price, change in affordability is critical. Cigarettes need to become less affordable for consumption to decline.</p>	<p>2.5</p> <p>Large tax shares of price are usually a good indicator that taxes are working.</p>	<p>5</p> <p>Best practices include relying more on uniform specific excise taxes that are adjusted regularly to outpace growth and inflation.</p>
