United Kingdom of Great Britain and Northern Ireland

How many people die from smoking in the United Kingdom each year?
124,908

What is the economic cost of smoking and tobacco use in the United Kingdom each year?
42,092,331,008 pound sterlings

Current Rates of Smoking and Tobacco Use in the United Kingdom

Tobacco use continues to be an epidemic in the United Kingdom. Government complacency in the face of the tobacco epidemic protects the tobacco industry in the United Kingdom as the death toll grows each year. Proponents of healthier societies must push for the implementation of evidence-based best practices in tobacco control to create change and reduce the negative effects of tobacco use.

Negative Effect of Tobacco Use in the United Kingdom

Tobacco use harms both the public and fiscal health of the United Kingdom, threatening efforts to improve equity, alleviate poverty, and protect the environment.

Societal Harms
The economic cost of smoking the United Kingdom is 42,092,331,008 pound sterlings. This includes direct costs related to healthcare expenditures and indirect costs related to lost productivity caused by illness and premature death.

Harms Development
Tobacco spending diverts funds from the resources that families need to rise out of poverty. On average in the United Kingdom, a smoker must spend 3.36% of GDP per capita to buy 100 packs of the most popular cigarettes in a year.

Environmental Harms
Cigarette butts are the most commonly discarded pieces of waste worldwide. It is estimated that 6,296 tons of butts wind up as toxic trash in the United Kingdom each year, equal to 1,799 female African elephants.

Harms Health Equity
The tobacco industry markets its products aggressively to lower-income populations and youth in the United Kingdom.

Harms NCDs
Not only is smoking a major risk factor for the 4 largest noncommunicable diseases (cancer, heart diseases, respiratory diseases, and diabetes), but people living with mental illness are nearly 2x as likely to smoke as other individuals.

Learn more about Health Effects.
Impact of the Tobacco Supply Chain on the United Kingdom

The tobacco industry profits significantly from producing and selling tobacco. At the same time, across the tobacco supply chain, there are significant negative health and economic repercussions for the United Kingdom.

Tobacco Production
There were approximately 34 billion cigarettes produced in the United Kingdom in 2016.

Tobacco Industry
The total revenue of the 6 largest tobacco companies in the world was USD 336 billion in 2019, about the same as Viet Nam's Gross National Income (GNI), 5x Ghana's GNI and 9x Paraguay's GNI.

Tobacco Growing
the United Kingdom is not a major producer of tobacco, but globally there were 3.1 million hectares of arable land dedicated to tobacco growing in 2021 which was nearly as much as the land dedicated to the world's large orange crop.

Learn more about global Growing and Product Sales.

Ending the Tobacco Epidemic in the United Kingdom

Fortunately, there are evidence-based -i.e. proven -solutions to the challenges posed by tobacco use. For several decades, governments around the world have been introducing a set of policies that address the demand for tobacco products, particularly among youth. These policies effectively reduce consumption and are cost-effective because they save goverments enormous amounts of money in health care spending and increase economic productivity.

Tobacco Tax Policies in the United Kingdom

Using evidence-based international recommendations/best practices, the Tobacconomics Cigarette Tax Scorecard assesses four components of tax systems - price, change in affordability, tax share, and structure - on a scale of 0 to 5, where a higher score is preferred.

Overall Score 4.38
The overall score is an average of the four component scores.

<table>
<thead>
<tr>
<th>Component</th>
<th>Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cigarette Price</td>
<td>5</td>
</tr>
<tr>
<td>Change in Affordability Over Time</td>
<td>3</td>
</tr>
<tr>
<td>Tax Share of Price</td>
<td>4.5</td>
</tr>
<tr>
<td>Tax Structure</td>
<td>5</td>
</tr>
</tbody>
</table>

Consumers respond to higher prices by decreasing consumption and some quit using tobacco.

In addition to price, change in affordability is critical. Cigarettes need to become less affordable for consumption to decline.

Large tax shares of price are usually a good indicator that taxes are working.

Best practices include relying more on uniform specific excise taxes that are adjusted regularly to outpace growth and inflation.
