27,839

What is the economic cost of smoking and tobacco use in Greece each year?

3,055,547,904

euros

Current Rates of Smoking and Tobacco Use in Greece

Tobacco use continues to be an epidemic in Greece. Government complacency in the face of the tobacco epidemic protects the tobacco industry in Greece as the death toll grows each year. Proponents of healthier societies must push for the implementation of evidence-based best practices in tobacco control to create change and reduce the negative effects of tobacco use.

Adult Smoking Prevalence in Greece

15+ years old; 2019

Men	Women
44.1%	32.2%

Adult smoking prevalence in Greece is 38%.

Number of Adult Smokers in Greece

15+ years old; 2019

Men	Women
1,784,288	1,350,210

Number of adult smokers in Greece is 3,134,499.

Youth Smoking Prevalence in Greece

10-14 years old; 2019

Boys	Girls
4.6%	4.6%

**30.3%**

Women

**12.9%**

22% of all deaths in Greece are caused by tobacco use.

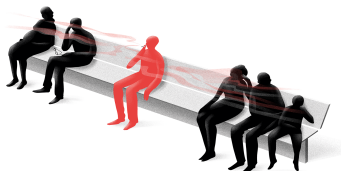

**Learn more about global Prevalence,  
Youth Smoking and Deaths.**

**Negative Effect of Tobacco Use in Greece**

**Tobacco use harms both the public and fiscal health of Greece, threatening efforts to improve equity, alleviate poverty, and protect the environment.**

**Societal Harms**

The economic cost of smoking Greece is 3,055,547,904 euros. This includes direct costs related to healthcare expenditures and indirect costs related to lost productivity caused by illness and premature death.

**Harms Development**

Tobacco spending diverts funds from the resources that families need to rise out of poverty. On average in Greece, a smoker must spend 2.93% of GDP per capita to buy 100 packs of the most popular cigarettes in a year.

**Environmental Harms**

Cigarette butts are the most commonly discarded pieces of waste worldwide. It is estimated that 2,525 tons of butts wind up as toxic trash in Greece each year, equal to 721 female African elephants.

**Harms Health Equity**

The tobacco industry markets its products aggressively to lower-income populations and youth in Greece.

**Harms NCDs**

Not only is smoking a major risk factor for the 4 largest noncommunicable diseases (cancer, heart diseases, respiratory diseases, and diabetes), but people living with mental illness are nearly 2x as likely to smoke as other individuals.

Impact of the Tobacco Supply Chain on Greece

The tobacco industry profits significantly from producing and selling tobacco. At the same time, across the tobacco supply chain, there are significant negative health and economic repercussions for Greece.

Tobacco Industry

The total revenue of the 6 largest tobacco companies in the world was USD 336 billion in 2019, about the same as Viet Nam's Gross National Income (GNI), 5x Ghana's GNI and 9x Paraguay's GNI.

Tobacco Production

There were approximately 29 billion cigarettes produced in Greece in 2016.

Tobacco Growing

There were 22530 tons of tobacco produced in Greece in 2019 on 14250 hectares of quality agricultural land that could have been used to grow food.

Ending the Tobacco Epidemic in Greece

Fortunately, there are evidence-based -i.e. proven -solutions to the challenges posed by tobacco use. For several decades, governments around the world have been introducing a set of policies that address the demand for tobacco products, particularly among youth. These policies effectively reduce consumption and are cost-effective because they save governments enormous amounts of money in health care spending and increase economic productivity.

Tobacco Tax Policies in Greece

Using evidence-based international recommendations/best practices, the Tobaccoconomics Cigarette Tax Scorecard assesses four components of tax systems - price, change in affordability, tax share, and structure - on a scale of 0 to 5, where a higher score is preferred.

Overall Score	Cigarette Price	Change in Affordability Over Time	Tax Share of Price	Tax Structure
3.88	4	3	4.5	4
The overall score is an average of the four component scores.	Consumers respond to higher prices by decreasing consumption and some quit using tobacco.	In addition to price, change in affordability is critical. Cigarettes need to become less affordable for consumption to decline.	Large tax shares of price are usually a good indicator that taxes are working.	Best practices include relying more on uniform specific excise taxes that are adjusted regularly to outpace growth and inflation.
