Malaysia

Current Rates of Smoking and Tobacco Use in Malaysia

Tobacco use continues to be an epidemic in Malaysia. Government complacency in the face of the tobacco epidemic protects the tobacco industry in Malaysia as the death toll grows each year. Proponents of healthier societies must push for the implementation of evidence-based best practices in tobacco control to create change and reduce the negative effects of tobacco use.

Deaths Caused by Tobacco in Malaysia

17% of all deaths in Malaysia are caused by tobacco use.

Negative Effect of Tobacco Use in Malaysia

Tobacco use harms both the public and fiscal health of Malaysia, threatening efforts to improve equity, alleviate poverty, and protect the environment.

Societal Harms

The economic cost of smoking Malaysia is 15,845,990,400 Malaysian ringgits. This includes direct costs related to healthcare expenditures and indirect costs related to lost productivity caused by illness and premature death.

Harms Development

Tobacco spending diverts funds from the resources that families need to rise out of poverty. On average in Malaysia, a smoker must spend 4.08% of GDP per capita to buy 100 packs of the most popular cigarettes in a year.

Environmental Harms

Cigarette butts are the most commonly discarded pieces of waste worldwide. It is estimated that 1,581 tons of butts wind up as toxic trash in Malaysia each year, equal to 452 female African elephants.

Harms Health Equity The tobacco industry markets its products aggressively to lower-income populations and youth in Malaysia.

Harms NCDs

Not only is smoking a major risk factor for the 4 largest noncommunicable diseases (cancer, heart diseases, respiratory diseases, and diabetes), but people living with mental illness are nearly 2x as likely to smoke as other individuals.

Ending the Tobacco Epidemic in Malaysia

Fortunately, there are evidence-based -i.e. proven -solutions to the challenges posed by tobacco use. For several decades, governments around the world have been introducing a set of policies that address the demand for tobacco products, particularly among youth. These policies effectively reduce consumption and are cost-effective because they save governments enormous amounts of money in health care spending and increase economic productivity.
