Negative Effect of Tobacco Use in FYR Macedonia

Tobacco use harms both the public and fiscal health of FYR Macedonia, threatening efforts to improve equity, alleviate poverty, and protect the environment.

Societal Harms

The economic cost of smoking FYR Macedonia is 18,832,089,088 denars. This includes direct costs related to healthcare expenditures and indirect costs related to lost productivity caused by illness and premature death.

Harms Development

Tobacco spending diverts funds from the resources that families need to rise out of poverty. On average in FYR Macedonia, a smoker must spend 2.93% of GDP per capita to buy 100 packs of the most popular cigarettes in a year.

Environmental Harms

Cigarette butts are the most commonly discarded pieces of waste worldwide. It is estimated that 809 tons of butts wind up as toxic trash in FYR Macedonia each year, equal to 231 female African elephants.

Harms Health Equity

The tobacco industry markets its products aggressively to lower-income populations and youth in North Macedonia.

Harms NCDs

Not only is smoking a major risk factor for the 4 largest noncommunicable diseases (cancer, heart diseases, respiratory diseases, and diabetes), but people living with mental illness are nearly 2x as likely to smoke as other individuals.

Learn more about **Health Effects.**

Impact of the Tobacco Supply Chain on FYR Macedonia

The tobacco industry profits significantly from producing and selling tobacco. At the same time, across the tobacco supply chain, there are significant negative health and economic repercussions for FYR Macedonia.

Tobacco Production

There were approximately 4 billion cigarettes produced in FYR Macedonia in 2016.

Tobacco Growing

There were 26234 tons of tobacco produced in North Macedonia in 2019 on 16679 hectares of quality agricultural land that could have been used to grow food.

Tobacco Industry

The total revenue of the 6 largest tobacco companies in the world was USD 336 billion in 2019, about the same as Viet Nam's Gross National Income (GNI), 5x Ghana's GNI and 9x Paraguay's GNI.

Ending the Tobacco Epidemic in FYR Macedonia

Fortunately, there are evidence-based -i.e. proven -solutions to the challenges posed by tobacco use. For several decades, governments around the world have been introducing a set of policies that address the demand for tobacco products, particularly among youth. These policies effectively reduce consumption and are cost-effective because they save governments enormous amounts of money in health care spending and increase economic productivity.
