Kenya

Current Rates of Smoking and Tobacco Use in Kenya

Tobacco use continues to be an epidemic in Kenya. Government complacency in the face of the tobacco epidemic protects the tobacco industry in Kenya as the death toll grows each year. Proponents of healthier societies must push for the implementation of evidence-based best practices in tobacco control to create change and reduce the negative effects of tobacco use.

Deaths Caused by Tobacco in Kenya

% deaths attributable to tobacco use in 2021

2.6% of all deaths in Kenya are caused by tobacco use.

Negative Effect of Tobacco Use in Kenya

Tobacco use harms both the public and fiscal health of Kenya, threatening efforts to improve equity, alleviate poverty, and protect the environment.

Societal Harms

The economic cost of smoking Kenya is 45,449,200,147 Kenyan shillings. This includes direct costs related to healthcare expenditures and indirect costs related to lost productivity caused by illness and premature death.

Harms Development

Tobacco spending diverts funds from the resources that families need to rise out of poverty. On average in Kenya, a smoker must spend 15.2% of GDP per capita to buy 100 packs of the most popular cigarettes in a year.

Environmental Harms

Cigarette butts are the most commonly discarded pieces of waste worldwide. It is estimated that 1,401 tons of butts wind up as toxic trash in Kenya each year, equal to 400 female African elephants.

Harms Health Equity The tobacco industry markets its products aggressively to lower-income populations and youth in Kenya.

Harms NCDs

Not only is smoking a major risk factor for the 4 largest noncommunicable diseases (cancer, heart diseases, respiratory diseases, and diabetes), but people living with mental illness are nearly 2x as likely to smoke as other individuals.

THE TOBACCO ATLAS

Impact of the Tobacco Supply Chain on Kenya

The tobacco industry profits significantly from producing and selling tobacco. At the same time, across the tobacco supply chain, there are significant negative health and economic repercussions for Kenya.

Tobacco Production There were approximately 17 billion cigarettes produced in Kenya in 2016.

Tobacco Industry

The total revenue of the 6 largest tobacco companies in the world was USD 362 billion in 2022, about the same as Pakistan's Gross National Income (GNI), 5x Panama's GNI and 9x Paraguay's GNI.

Tobacco Growing There were 10,663 tons of tobacco produced in Kenya in 2022 on 15,202 hectares of quality agricultural land that could have been used to grow food.

Ending the Tobacco Epidemic in Kenya

Fortunately, there are evidence-based -i.e. proven -solutions to the challenges posed by tobacco use. For several decades, governments around the world have been introducing a set of policies that address the demand for tobacco products, particularly among youth. These policies effectively reduce consumption and are cost-effective because they save governments enormous amounts of money in health care spending and increase economic productivity.
