4,020

What is the economic cost of smoking and tobacco use in Lithuania each year?

1,265,190,585

euros

Current Rates of Smoking and Tobacco Use in Lithuania

Tobacco use continues to be an epidemic in Lithuania. Government complacency in the face of the tobacco epidemic protects the tobacco industry in Lithuania as the death toll grows each year. Proponents of healthier societies must push for the implementation of evidence-based best practices in tobacco control to create change and reduce the negative effects of tobacco use.

Negative Effect of Tobacco Use in Lithuania

Tobacco use harms both the public and fiscal health of Lithuania, threatening efforts to improve equity, alleviate poverty, and protect the environment.

Societal Harms

The economic cost of smoking Lithuania is 1,265,190,585 euros. This includes direct costs related to healthcare expenditures and indirect costs related to lost productivity caused by illness and premature death.

Harms Development

Tobacco spending diverts funds from the resources that families need to rise out of poverty. On average in Lithuania, a smoker must spend 1.9% of GDP per capita to buy 100 packs of the most popular cigarettes in a year.

Environmental Harms

Cigarette butts are the most commonly discarded pieces of waste worldwide. It is estimated that 7,480 tons of butts wind up as toxic trash in Lithuania each year, equal to 2,770 female African elephants.

Harms Health Equity

The tobacco industry markets its products aggressively to lower-income populations and youth in Lithuania.

Harms NCDs

Not only is smoking a major risk factor for the 4 largest noncommunicable diseases (cancer, heart diseases, respiratory diseases, and diabetes), but people living with mental illness are nearly 2x as likely to smoke as other individuals.

Impact of the Tobacco Supply Chain on Lithuania

The tobacco industry profits significantly from producing and selling tobacco. At the same time, across the tobacco supply chain, there are significant negative health and economic repercussions for Lithuania.

Tobacco Production

There were approximately 37,399,600,000 cigarettes produced in Lithuania in 2023.

Tobacco Growing

Lithuania is not a major producer of tobacco, but globally there were 4.1 million hectares of arable land dedicated to tobacco growing in 2022 which was nearly as much as the land dedicated to the world's large orange crop.

Tobacco Industry

The total revenue of the 6 largest tobacco companies in the world was USD 362 billion in 2022, about the same as Pakistan's Gross National Income (GNI), 5x Panama's GNI and 9x Paraguay's GNI.

Ending the Tobacco Epidemic in Lithuania

Fortunately, there are evidence-based -i.e. proven -solutions to the challenges posed by tobacco use. For several decades, governments around the world have been introducing a set of policies that address the demand for tobacco products, particularly among youth. These policies effectively reduce consumption and are cost-effective because they save governments enormous amounts of money in health care spending and increase economic productivity.
