12,838

What is the economic cost of smoking and tobacco use in Australia each year?

24,513,882,768

Australian dollars

## **Current Rates of Smoking and Tobacco Use in Australia**

Tobacco use continues to be an epidemic in Australia. Government complacency in the face of the tobacco epidemic protects the tobacco industry in Australia as the death toll grows each year. Proponents of healthier societies must push for the implementation of evidence-based best practices in tobacco control to create change and reduce the negative effects of tobacco use.

### **Adult Smoking Prevalence in Australia**

7.3% of all deaths in Australia are caused by tobacco use.

# Learn more about global Prevalence, Youth Smoking and Deaths.

# **Negative Effect of Tobacco Use in Australia**

Tobacco use harms both the public and fiscal health of Australia, threatening efforts to improve equity, alleviate poverty, and protect the environment.

#### **Societal Harms**

The economic cost of smoking Australia is 24,513,882,768 Australian dollars. This includes direct costs related to healthcare expenditures and indirect costs related to lost productivity caused by illness and premature death.

## **Harms Development**

Tobacco spending diverts funds from the resources that families need to rise out of poverty. On average in Australia, a smoker must spend 3.5% of GDP per capita to buy 100 packs of the most popular cigarettes in a year.

#### **Environmental Harms**

Cigarette butts are the most commonly discarded pieces of waste worldwide. It is estimated that 2,121 tons of butts wind up as toxic trash in Australia each year, equal to 606 female African elephants.

## **Harms Health Equity**

The tobacco industry markets its products aggressively to lower-income populations and youth in Australia.

## **Harms NCDs**

Not only is smoking a major risk factor for the 4 largest noncommunicable diseases (cancer, heart diseases, respiratory diseases, and diabetes), but people living with mental illness are nearly 2x as likely to smoke as other individuals.

**Learn more about Health Effects.** 

# Impact of the Tobacco Supply Chain on Australia

The tobacco industry profits significantly from producing and selling tobacco. At the same time, across the tobacco supply chain, there are significant negative health and economic repercussions for Australia.

## **Tobacco Production**

There were more than 5,000,000,000,000 cigarettes produced in the world in 2019, or nearly 2 cigarettes per person per day.

#### **Tobacco Industry**

The total revenue of the 6 largest tobacco companies in the world was USD 362 billion in 2022, about the same as Pakistan's Gross National Income (GNI), 5x Panama's GNI and 9x Paraguay's GNI.

#### **Tobacco Growing**

There were 2,511 tons of tobacco produced in Australia in 2022 on 892 hectares of quality agricultural land that could have been used to grow food.

# **Ending the Tobacco Epidemic in Australia**

Fortunately, there are evidence-based -i.e. proven -solutions to the challenges posed by tobacco use. For several decades, governments around the world have been introducing a set of policies that address the demand for tobacco products, particularly among youth. These policies effectively reduce consumption and are cost-effective because they save goverments enormous amounts of money in health care spending and increase economic productivity.

## **Tobacco Tax Policies in Australia**

Using evidence-based international recommendations/best practices, the Tobacconomics Cigarette Tax Scorecard assesses four components of tax systems - price, change in affordability, tax share, and structure - on a scale of 0 to 5, where a higher score is preferred.

**Overall Score** 

3.63

The overall score is an average of the four component scores.

**Cigarette Price** 

5.00

Consumers respond to higher prices by decreasing consumption and some quit using tobacco.

Change in Affordability Over Time

0.00

In addition to price, change in affordability is critical. Cigarettes need to become less affordable for consumption to decline. **Tax Share of Price** 

4.50

Large tax shares of price are usually a good indicator that taxes are working.

**Tax Structure** 

5.00

Best practices include relying more on uniform specific excise taxes that are adjusted regularly to outpace growth and inflation.
