# Bahamas

### **Current Rates of Smoking and Tobacco Use in The Bahamas**

Tobacco use continues to be an epidemic in the Bahamas. Government complacency in the face of the tobacco epidemic protects the tobacco industry in the Bahamas as the death toll grows each year. Proponents of healthier societies must push for the implementation of evidence-based best practices in tobacco control to create change and reduce the negative effects of tobacco use.

#### **Deaths Caused by Tobacco in The Bahamas**

% deaths attributable to tobacco use in 2021

Men

# Learn more about global Prevalence, Youth Smoking and Deaths.

3.6% of all deaths in the Bahamas are caused by tobacco use.

### Negative Effect of Tobacco Use in the Bahamas

Tobacco use harms both the public and fiscal health of The Bahamas, threatening efforts to improve equity, alleviate poverty, and protect the environment.

#### **Societal Harms**

The economic cost of smoking the Bahamas is 76,581,608 Bahamian dollars. This includes direct costs related to healthcare expenditures and indirect costs related to lost productivity caused by illness and premature death.

#### **Harms Development**

Tobacco spending diverts funds from the resources that families need to rise out of poverty. On average in the Bahamas, a smoker must spend 3.7% of GDP per capita to buy 100 packs of the most popular cigarettes in a year.

#### **Environmental Harms**

Cigarette butts are the most commonly discarded pieces of waste worldwide. It is estimated that 1,102,311 tons of butts wind up as toxic trash in the world each year, equal to 416,667 female African elephants.

Harms Health Equity The tobacco industry markets its products aggressively to lower-income populations and youth in the Bahamas.

#### **Harms NCDs**

Not only is smoking a major risk factor for the 4 largest noncommunicable diseases (cancer, heart diseases, respiratory diseases, and diabetes), but people living with mental illness are nearly 2x as likely to smoke as other individuals.

Paraguay's GNI.

### Impact of the Tobacco Supply Chain on The Bahamas

The tobacco industry profits significantly from producing and selling tobacco. At the same time, across the tobacco supply chain, there are significant negative health and economic repercussions for the Bahamas.

#### **Tobacco Production**

There were more than 5,000,000,000 cigarettes produced in the world in 2019, or nearly 2 cigarettes per person per day.

# Tobacco Growing

the Bahamas is not a major producer of tobacco, but globally there were 4.1 million hectares of arable land dedicated to tobacco growing in 2022 which was nearly as much as the land dedicated to the world's large orange crop.

### **Ending the Tobacco Epidemic in The Bahamas**

The total revenue of the 6 largest tobacco companies in the world was USD 362 billion in

2022, about the same as Pakistan's Gross National Income (GNI), 5x Panama's GNI and 9x

Fortunately, there are evidence-based -i.e. proven -solutions to the challenges posed by tobacco use. For several decades, governments around the world have been introducing a set of policies that address the demand for tobacco products, particularly among youth. These policies effectively reduce consumption and are cost-effective because they save governments enormous amounts of money in health care spending and increase economic productivity.
