What is the economic cost of smoking and tobacco use in Paraguay each year?

2,428,648,090,427

guaranis

Current Rates of Smoking and Tobacco Use in Paraguay

Tobacco use continues to be an epidemic in Paraguay. Government complacency in the face of the tobacco epidemic protects the tobacco industry in Paraguay as the death toll grows each year. Proponents of healthier societies must push for the implementation of evidence-based best practices in tobacco control to create change and reduce the negative effects of tobacco use.

Negative Effect of Tobacco Use in Paraguay

Tobacco use harms both the public and fiscal health of Paraguay, threatening efforts to improve equity, alleviate poverty, and protect the environment.

Societal Harms

The economic cost of smoking Paraguay is 2,428,648,090,427 guaranis. This includes direct costs related to healthcare expenditures and indirect costs related to lost productivity caused by illness and premature death.

Harms Development

Tobacco spending diverts funds from the resources that families need to rise out of poverty. On average in Paraguay, a smoker must spend 0.8% of GDP per capita to buy 100 packs of the most popular cigarettes in a year.

Environmental Harms

Cigarette butts are the most commonly discarded pieces of waste worldwide. It is estimated that 369 tons of butts wind up as toxic trash in Paraguay each year, equal to 105 female African elephants.

Harms Health Equity

The tobacco industry markets its products aggressively to lower-income populations and youth in Paraguay.

Harms NCDs

Not only is smoking a major risk factor for the 4 largest noncommunicable diseases (cancer, heart diseases, respiratory diseases, and diabetes), but people living with mental illness are nearly 2x as likely to smoke as other individuals.

Learn more about **Health Effects**.

Impact of the Tobacco Supply Chain on Paraguay

The tobacco industry profits significantly from producing and selling tobacco. At the same time, across the tobacco supply chain, there are significant negative health and economic repercussions for Paraguay.

Tobacco Production

There were more than 5,000,000,000,000 cigarettes produced in the world in 2019, or nearly 2 cigarettes per person per day.

Tobacco Industry

The total revenue of the 6 largest tobacco companies in the world was USD 362 billion in 2022, about the same as Pakistan's Gross National Income (GNI), 5x Panama's GNI and 9x Paraguay's GNI.

Tobacco Growing

There were 5,790 tons of tobacco produced in Paraguay in 2022 on 3,587 hectares of quality agricultural land that could have been used to grow food.

Ending the Tobacco Epidemic in Paraguay

Fortunately, there are evidence-based -i.e. proven -solutions to the challenges posed by tobacco use. For several decades, governments around the world have been introducing a set of policies that address the demand for tobacco products, particularly among youth. These policies effectively reduce consumption and are cost-effective because they save governments enormous amounts of money in health care spending and increase economic productivity.
