### Negative Effect of Tobacco Use in Sao Tome and Principe

Tobacco use harms both the public and fiscal health of Sao Tome and Principe, threatening efforts to improve equity, alleviate poverty, and protect the environment.

#### Societal Harms

The economic cost of smoking Sao Tome and Principe is 27,077,956 dobra. This includes direct costs related to healthcare expenditures and indirect costs related to lost productivity caused by illness and premature death.

#### Harms Development

Tobacco spending diverts funds from the resources that families need to rise out of poverty. On average in Sao Tome and Principe, a smoker must spend 6.9% of GDP per capita to buy 100 packs of the most popular cigarettes in a year.

#### Harms Health Equity

The tobacco industry markets its products aggressively to lower-income populations and youth in Sao Tome and Principe.

#### Environmental Harms

Cigarette butts are the most commonly discarded pieces of waste worldwide. It is estimated that 1,102,311 tons of butts wind up as toxic trash in the world each year, equal to 416,667 female African elephants.

#### Harms NCDs

Not only is smoking a major risk factor for the 4 largest noncommunicable diseases (cancer, heart diseases, respiratory diseases, and diabetes), but people living with mental illness are nearly 2x as likely to smoke as other individuals.

Impact of the Tobacco Supply Chain on Sao Tome and Principe

The tobacco industry profits significantly from producing and selling tobacco. At the same time, across the tobacco supply chain, there are significant negative health and economic repercussions for Sao Tome and Principe.

Tobacco Industry

The total revenue of the 6 largest tobacco companies in the world was USD 362 billion in 2022, about the same as Pakistan's Gross National Income (GNI), 5x Panama's GNI and 9x Paraguay's GNI.

Tobacco Production

There were more than 5,000,000,000,000 cigarettes produced in the world in 2019, or nearly 2 cigarettes per person per day.

Tobacco Growing

Sao Tome and Principe is not a major producer of tobacco, but globally there were 4.1 million hectares of arable land dedicated to tobacco growing in 2022 which was nearly as much as the land dedicated to the world's large orange crop.
