Viet Nam

Current Rates of Smoking and Tobacco Use in Viet Nam

Tobacco use continues to be an epidemic in Viet Nam. Government complacency in the face of the tobacco epidemic protects the tobacco industry in Viet Nam as the death toll grows each year. Proponents of healthier societies must push for the implementation of evidence-based best practices in tobacco control to create change and reduce the negative effects of tobacco use.

14.3% of all deaths in Viet Nam are caused by tobacco use.

Negative Effect of Tobacco Use in Viet Nam

Tobacco use harms both the public and fiscal health of Viet Nam, threatening efforts to improve equity, alleviate poverty, and protect the environment.

Societal Harms

The economic cost of smoking Viet Nam is 161,245,083,230,161 dongs. This includes direct costs related to healthcare expenditures and indirect costs related to lost productivity caused by illness and premature death.

Harms Development

Tobacco spending diverts funds from the resources that families need to rise out of poverty. On average in Viet Nam, a smoker must spend 2.4% of GDP per capita to buy 100 packs of the most popular cigarettes in a year.

Environmental Harms

Cigarette butts are the most commonly discarded pieces of waste worldwide. It is estimated that 27,472 tons of butts wind up as toxic trash in Viet Nam each year, equal to 10,175 female African elephants.

Harms Health Equity The tobacco industry markets its products aggressively to lower-income populations and vouth in Viet Nam.

Harms NCDs

Not only is smoking a major risk factor for the 4 largest noncommunicable diseases (cancer, heart diseases, respiratory diseases, and diabetes), but people living with mental illness are nearly 2x as likely to smoke as other individuals.

THE TOBACCO ATLAS

Impact of the Tobacco Supply Chain on Viet Nam

The tobacco industry profits significantly from producing and selling tobacco. At the same time, across the tobacco supply chain, there are significant negative health and economic repercussions for Viet Nam.

Tobacco Production There were approximately 137,360,000,000 cigarettes produced in Viet Nam in 2023.

Tobacco Industry

The total revenue of the 6 largest tobacco companies in the world was USD 362 billion in 2022, about the same as Pakistan's Gross National Income (GNI), 5x Panama's GNI and 9x Paraguay's GNI.

Tobacco Growing There were 34,872 tons of tobacco produced in Viet Nam in 2022 on 13,753 hectares of quality agricultural land that could have been used to grow food.

Ending the Tobacco Epidemic in Viet Nam

Fortunately, there are evidence-based -i.e. proven -solutions to the challenges posed by tobacco use. For several decades, governments around the world have been introducing a set of policies that address the demand for tobacco products, particularly among youth. These policies effectively reduce consumption and are cost-effective because they save governments enormous amounts of money in health care spending and increase economic productivity.

Tobacco Tax Policies in Viet Nam

Using evidence-based international recommendations/best practices, the Tobacconomics Cigarette Tax Scorecard assesses four components of tax systems - price, change in affordability, tax share, and structure - on a scale of 0 to 5, where a higher score is preferred.

Overall Score

Cigarette Price

O.75 The overall score is an average of the four component scores.

Consumers respond to higher prices by decreasing consumption and some quit using tobacco. Change in Affordability Over Time

0.00

In addition to price, change in affordability is critical. Cigarettes need to become less affordable for consumption to decline. Tax Share of Price

O.OO Large tax shares of price are usually a good indicator that taxes are working. Tax Structure

2.00 Best practices include relying more on uniform specific excise taxes that are adjusted regularly to outpace

growth and inflation.
