Ending the Tobacco Epidemic in Yemen

Fortunately, there are evidence-based -i.e. proven -solutions to the challenges posed by tobacco use. For several decades, governments around the world have been introducing a set of policies that address the demand for tobacco products, particularly among youth. These policies effectively reduce consumption and are cost-effective because they save governments enormous amounts of money in health care spending and increase economic productivity.

Tobacco Tax Policies in Yemen

Using evidence-based international recommendations/best practices, the Tobacconomics Cigarette Tax Scorecard assesses four components of tax systems - price, change in affordability, tax share, and structure - on a scale of 0 to 5, where a higher score is preferred.

| Overall Score | Cigarette Price | Change in Affordability Over Time | Tax Share of Price | Tax Structure |
|---|---|---|---|--|
| Insufficient data The overall score is an average of the four component scores. | Insufficient data Consumers respond to higher prices by decreasing consumption and some quit using tobacco. | 4.00 In addition to price, change in affordability is critical. Cigarettes need to become less affordable for consumption to decline. | 2.50 Large tax shares of price are usually a good indicator that taxes are working. | 2.00 Best practices include relying more on uniform specific excise taxes that are adjusted regularly to outpace growth and inflation. |
