57,681

What is the annual cost-of-illness attributable to smoking in France each year?

38,983,909,677

euros

Current Rates of Smoking and Tobacco Use in France

Tobacco use continues to be an epidemic in France. Government complacency in the face of the tobacco epidemic protects the tobacco industry in France as the death toll grows each year. Proponents of healthier societies must push for the implementation of evidence-based best practices in tobacco control to create change and reduce the negative effects of tobacco use.

Negative Effect of Tobacco Use in France

Tobacco use harms both the public and fiscal health of France, threatening efforts to improve equity, alleviate poverty, and protect the environment.

Societal Harms

The annual cost-of-illness attributable to smoking in France is 38,983,909,677 euros. This includes direct costs related to healthcare expenditures and indirect costs related to lost productivity caused by illness and premature death.

Harms Development

Tobacco spending diverts funds from the resources that families need to rise out of poverty. On average in France, a smoker must spend 2.84% of GDP per capita to buy 100 packs of the most popular cigarettes in a year.

Environmental Harms

Cigarette butts are the most commonly discarded pieces of waste worldwide. It is estimated that 5,143 tons of butts wind up as toxic trash in France each year, equal to 1,905 female African elephants.

Harms Health Equity

The tobacco industry markets its products aggressively to lower-income populations and youth in France.

Harms NCDs

Not only is smoking a major risk factor for the 4 largest noncommunicable diseases (cancer, heart diseases, respiratory diseases, and diabetes), but people living with mental illness are nearly 2x as likely to smoke as other individuals.

Impact of the Tobacco Supply Chain on France

The tobacco industry profits significantly from producing and selling tobacco. At the same time, across the tobacco supply chain, there are significant negative health and economic repercussions for France.

Tobacco Production

There were approximately 1,669,000,000 cigarettes produced in France in 2024.

Tobacco Growing

There were 2,920 tons of tobacco produced in France in 2023 on 1,060 hectares of quality agricultural land that could have been used to grow food.

Tobacco Industry

The total revenue of the 6 largest tobacco companies in the world was USD 364 billion in 2023, about the same as Pakistan's Gross National Income (GNI), 5x Panama's GNI and 9x Paraguay's GNI.

Ending the Tobacco Epidemic in France

Fortunately, there are evidence-based i.e. proven-solutions to the challenges posed by tobacco use. For several decades, governments around the world have been introducing a set of policies that address the demand for tobacco products, particularly among youth. These policies effectively reduce consumption and are cost-effective because they save governments enormous amounts of money in health care spending and increase economic productivity.
